Letter of Recommendation

I am writing this letter in support of Alina Huda and her desire to pursue masters in Computer Science at your university. I have known Alina for 6 months when she joined my team as fresher during crucial time of the project. She consistently attended 10 days of domain and tool training and started working on the client requirement within a week of training.

Our client being one of the leading financial services corporation, I was quite apprehensive at the beginning while the work was being allotted. To my surprise, she got hand on Oracle Advanced Benefit Application really quick and was able to perform efficiently on the assigned tasks. She strived hard to deliver quality work within the given deadline.

From Creating the test plan based on identified architecture and support implementation of the design to validating the test cases, Alina has completed the work with accuracy. Annual enrollment is an important procedure for all the financial corporations, so it is important that all the processes that involve validating rates and premiums of the client's, eligibility, electability, extracts, EOI, verifying the coverage amount based on client requirements to be done precisely. Alina has diligently worked towards these and exhibited an exceptional performance throughout annual enrollment period.

Alina is a team player. Within a short period of time she became in good terms with all the team members. She would also proactively help her colleagues in completing their work. She has won an "Insta" award for answering most of the questions during a technical quiz conducted among the newly joined employees. She has got "Exceeded Expectation" rating in the annual appraisal period of the company.

She has also undertaken several internal trainings in PeopleSoft Technology, Oracle Fusion Apps, PL/SQL. Overall, Alina has done a commendable work. I am confident that she is competent enough to pursue masters in your prestigious university and will match up to the reputation of your institution. Please do not hesitate to contact me for further questions.

Yours Sincerely,

Joseph
